# ivuze

Healthcare Anywhere, Anytime

# INTRODUCTION

Ivuze is a digital healthcare platform designed to connect patients with healthcare providers such as doctors, hospitals, and pharmacies across Rwanda. Its primary purpose is to improve access to quality health services by leveraging digital technology for booking appointments, telemedicine consultations, and communication between patients and health professionals

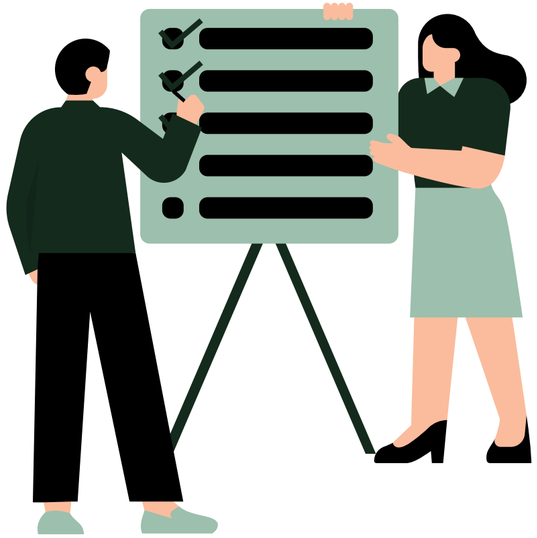
# MISSION AND PURPOSE

- Connecting patients with doctors and hospitals throughout Rwanda
- Offering online healthcare services such as appointment booking and telemedicine
- Providing trusted digital care for families and individuals seeking medical attention
- Supporting accessible and timely healthcare, including virtual consultations
- These align with broader national efforts to integrate digital tools into healthcare delivery.

# KEY FEATURES

## Appointment Booking

Patients can search for healthcare providers and book appointments online.



## Telemedicine Consultations

Users can connect with clinicians or specialists remotely without visiting a physical clinic.

## Healthcare Provider Director

A database or listing of trusted doctors, hospitals, and pharmacies to choose from.

## pharmacy derivery

patients can access medicines through the platform

## Communication Tools

Possibilities for messaging or digital contact between patients and providers.

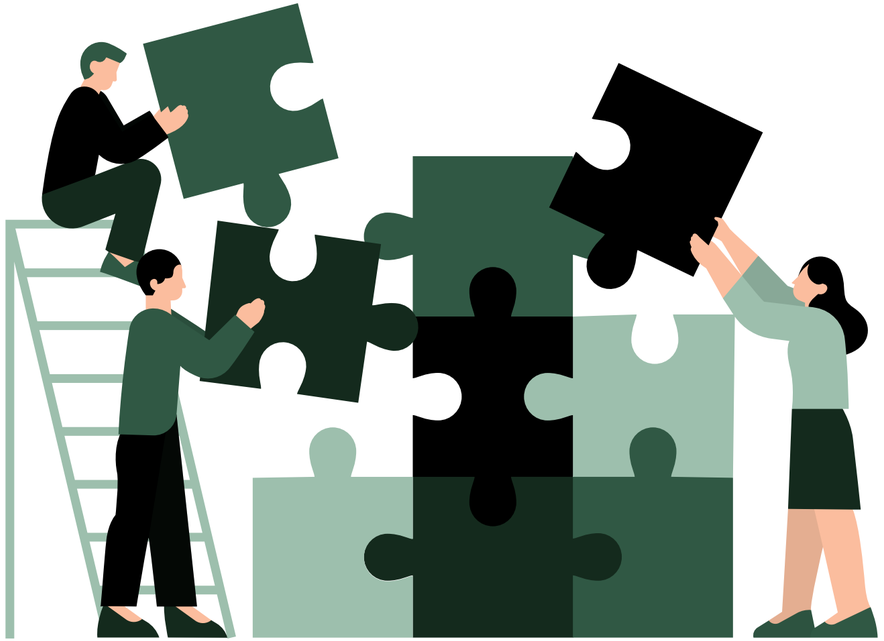
# COMPETION TABLE

| Platform | What it Mainly Does | Weakness | Why **e-Ivuze** is Stronger |
|---|---|---|---|
| **Babyl Rwanda** | Online doctor consultations by phone | Focuses mainly on telemedicine, closes its operations not working in rwanda | e-Ivuze connects **doctors, hospitals, pharmacies, labs, and AI** in one system |
| **e-Ubuzima** | Government digital patient records | Mostly for hospitals, not a full telemedicine platform | e-Ivuze includes **video consultations + full healthcare ecosystem** |
| **Hospital Software** | Internal hospital management | Not accessible to patients | e-Ivuze connects **patients directly with the healthcare system** |
| **Other small health apps** | Health advice or limited services | Not integrated with hospitals or labs | e-Ivuze provides **end-to-end healthcare journey** |

# STRATEGIC CONTRIBUTION

Ivuze helps make health care easier for people by letting them find doctors, book appointments online, and get medical help without going to the clinic. It supports the work of Rwanda's health system by using digital tools, which reduce waiting time and help patients connect with doctors faster at home or in town. This fits with Rwanda's goal to use digital health and technology to improve access and quality of health services for everyone.

It also helps health care work better by bringing patients and providers together in one platform so patient information and appointments are easier to manage and share. This kind of digital system helps doctors and nurses keep track of medical records, schedule patients, and give care more quickly and accurately. By using technology like online booking and remote care, Onehealthline contributes to Rwanda's bigger plan for a connected, modern health care system.



# TARGET USERS

**Patients & Families**

- Individuals seeking convenient access to health care services
- Users needing remote consultations or appointment scheduling

**Healthcare Providers**

- Private and public healthcare professionals
- Hospitals and clinics in Rwanda

**Healthcare Sector Stakeholders**

- Health administrators interested in digital transformation

# REVENUE PLAN

### B2B: Clinics

Monthly subscription fee for access to our comprehensive clinic management dashboard.

### B2C: Patients

Small convenience fee per booking via system or the mobile app.

### B2B: Pharmacies

Commission on prescription referrals, integrating a vital part of the patient journey.

# PROGRAM BENEFITS

**For Patients**

- Reduces the need to travel long distances to access care
- Enables faster booking and fewer queues
- Provides access to specialists remotely

**For Providers**

- Expands reach to patients beyond physical clinic visits
- Supports digital scheduling and care coordination

**For the Health System**

- Contributes to Rwanda's digital health goals
- Helps integrate private sector solutions with national health services

# CONCLUSION

Ivuze is positioned as a digital health platform in Rwanda that facilitates appointment booking, telemedicine, and healthcare access online. It supports Rwanda's broader digital health goals and aims to improve accessibility and quality of care through practical technology solutions for both patients and providers
